LEGISLATIVE POSITION

REQUEST FUNDING FOR: WELLNESS WAY CORRIDOR FROM US 27 TO SR 429, CLERMONT

POSITION

The Lake County Board of County Commissioners (LCBCC) requests that the Lake County Delegation support funding for the Wellness Way Corridor. This corridor is in the City of Clermont, unincorporated Lake County, and Orange County, and will connect US 27 to the SR 429 Expressway in Orange County. This project will improve traffic circulation but most importantly will support a regionally significant employment center in South Lake County. Lake County is currently conducting a 16,000 acre Sector Plan and when supported by Wellness Way, will provide annual economic impacts in excess of \$500,000,000.00 and provide over 23,000 jobs.

BACKGROUND/JUSTIFICATION

The Wellness Way Corridor will provide inter-regional traffic and goods movement from US 27 to SR 429 for new proposed Lake County Economic Development Sector Plan within South Lake County.

The Wellness Way Corridor is an important component of the Lake County Economic Goals for the South Lake Master Sector Plan along the Wellness Way Corridor. The Sector Plan promotes a new Business Development and a regionally significant employment center. The project will improve efficiency of the existing transportation system by resolving capacity constraints on US 27 and providing direct access to SR 429. The funding request is for a Project Development and Environmental Study which is required prior to entering into design or right of way acquisition.

APPROPRIATION

The Lake County Board of County Commissioners is requesting \$ 1.25 million for a Project Development and Environmental Study (PD&E) for the Wellness Way Project. Requests for other funding sources will be based on feedback from the Florida Legislature.

FISCAL IMPACT

\$ 1.25 Million

Legislative Position
Maintain State Aid to Libraries Operating Grant Appropriations

Position

The Lake County Board of County Commissioners requests the Lake County Legislative Delegation's continued support of the State Aid to Libraries Operating Grant program funding. The Board of County Commissioners understands how difficult it has been to balance the state budget over the past few years and greatly appreciates the efforts of the Lake County Delegation to maintain its support of State Aid funding.

Background/Justification

The State Aid to Libraries Operating Grant program is a continuing State grant program, authorized under Chapter 257, Florida Statutes. State Aid provides financial encouragement for all 67 counties to provide freely accessible public library services to those taxed for the service. It fosters the growth and innovation of new ideas to provide library and information services to the residents of Florida based on local service plans. The law authorizes a match of up to 25 cents on each dollar of local expenditure for library services. The state match reached a high of 11 cents on the dollar in FY 98/99 and has steadily declined since then to about 2.5 cents on the dollar. For the last two years, the appropriation for the entire state has stayed at \$21.3 million. Thanks to the support of the Florida Legislature during the last session, the allocation to Lake County actually increases from \$188,720 in FY 11/12 to an estimated \$197,421 for FY 12/13.

In Lake County the State Aid grant funds are used to support system-wide technology infrastructure including public access computers, subscriptions to online reference databases for public use, and county-wide literacy programs. At the same time that citizens are in greater need of government services, public libraries are increasingly acting as surrogates for state and federal agencies in service delivery.

Additionally, an appropriation of at least \$21.3 million makes it possible for the state to receive approximately \$8 million in federal Library Services and Technology Act grants. This money funds many statewide services that directly affect local citizens, such as the Florida Electronic Library reference web site, the Ask-A-Librarian chat reference service, and statewide interlibrary loan delivery.

Appropriation Amount

At a minimum, the funding level should be maintained at \$21.3 million in recurring and non-recurring funds.

Fiscal Impact

Any additional reduction of State Aid to Libraries would further endanger Lake County's ability to provide online services to the public and to continue programming to children, teenagers, and adults.

LEGISLATIVE POSITION

State Housing Initiative Program (SHIP) Funds

POSITION

The Lake County Board of County Commissioners (LCBCC) requests the Lake County Delegation support an increase and/or full funding of the **State Housing Initiative Program (SHIP)** funds. These funds would assist Lake County families in need.

BACKGROUND/JUSTIFICATION

The State Housing Initiative Program (SHIP) is a state funded affordable housing trust fund designed to provide support to local jurisdictions in an overall effort to create and sustain affordable housing through the collection of doc stamp fees. During the past four years the funds have been redirected for use by our state legislators in an attempt to balance the state's budget. Consequently, the affordable housing needs have increased exponentially over this period of time primarily due to the loss of funding and the overall state of the economy. We need full restoration of the SHIP funds to provide adequately for our families in need. We were historically awarded approximately \$2M annually to support various housing and development needs for our county.

If funded these funds would provide funding for up to 75 families annually as well as provide an economic boost to hundreds of contractors and laborers that have suffered in the down housing market.

APPROPRIATION

The Lake County Board of County Commissioners is requesting up to \$2,000,000 to provide SHIP funds for Lake County families.

FISCAL IMPACT

Up to \$2,000,000.

LEGISLATIVE POSITION

Challenge Grant and Housing Homeless Recovery (HHR) Grant

POSITION

The Lake County Board of County Commissioners (LCBCC) requests the Lake County Delegation to support increased and/or full funding for the Challenge Grant and Housing Homeless Recovery (HHR) Grant. This grant will assist in providing families in need safe housing.

BACKGROUND/JUSTIFICATION

During the past year the numbers of homeless families have increased dramatically due to a lack of jobs, increased rents, and diminishing safety nets that were provided at a local level for low-income working families. We need an increase in funding to assist in providing safe, decent housing and adequate support services for our families in need.

During the past two years the Challenge Grant and Housing Homeless Recovery grants have been eliminated. The loss of the grant funds to Lake County has impacted up to \$850,000 annually. More than 100 families can be housed and provided support services with these funds.

APPROPRIATION

The Lake County Board of County Commissioners is requesting up to \$850,000 this year for the Challenge Grant and Housing Homeless Recovery grants.

FISCAL IMPACT

Up to \$850,000.

LEGISLATIVE POSITION

Fuel Spill Remediation and Cleanup Phase II Construction

POSITION

The Lake County Board of County Commissioners (LCBCC) requests the Lake County Delegation request/support funding the **Fuel Spill Remediation and Cleanup Phase II Construction**. This project will assist Lake County to clean up a hazardous fuel spill affecting ground water in Tavares, FL.

BACKGROUND/JUSTIFICATION

The Fuel Spill occurred in the 1980's due to an underground gasoline storage tank leakage at the county vehicle fueling facility. The fuel contamination has spread rapidly over the last few years and has also reached deep into the surficial aquifer. The fuel spill currently lies wholly on county property located at the County's Solid Waste Facility in Tavares, FL. The County has already invested \$1,000,000 into the project and of that has received \$300,000 from FDEP for the cleanup. These funds have been expended on ground water testing and evaluation, design, and construction of Phase I of the facility. There are no other Grant Funds available from FDEP or other sources to assist Lake County at this time.

Phase I of the facility has built a curtain wall of wells to pump ground water to a remediation facility which removes the pollutants from the water. The operation of the Phase I program is approximately \$209,000 annually. The cost to construct the next phase is \$437,000. This operation will never cease until the source of the pollutants is removed at the old storage tank site. The estimated cost over a ten year period to remove the pollutants from the ground water is \$2,500,000. This will include construction of Phase II and Operation and maintenance of the system for ten years to finally remove all of the pollutants to an acceptable concentration in the groundwater.

APPROPRIATION

The Lake County Board of County Commissioners is requesting \$646,000 this year for a fuel spill remediation and cleanup on County owned property in Tavares.

FISCAL IMPACT

\$ 2,500,000.

Legislative Position

Support Continued Funding Assistance for the Mosquito Control Program

Position

The Lake County Board of County Commissioners wishes to thank the Florida Legislature for its continued support for funding the Mosquito Control Program. Funding of the Mosquito Control Program enables local governments to continue performing mosquito abatement and continues the support of important and much needed mosquito research throughout the state of Florida. The Legislature is requested to continue funding these programs which are vital to protecting the residents of the state of Florida. It is vital for the Legislature to maintain the already existing rule for the pass through dollars supporting mosquito abatement programs throughout the state from the Waste Tire Fund in the total amount of \$1.2 million. Twenty to thirty years ago when the Waste Tire Fund was first established the total amount was in the \$20-\$30 million range which enabled a much higher level of funding (\$60,000 to \$80,000) for the Lake County Mosquito program. It would be desirable to return to those original levels.

Background/Justification

The Lake County Board of County Commissioners will require continued funding assistance for the Mosquito Control Program. The funds will allow us to reduce the potential for residents and visitors to face health risks associated with mosquito transmitted diseases. The Lake County Mosquito Management Section manages mosquitoes and other biting arthropods of public health importance to reduce the risk of arboviral disease amplification and transmission to humans and domesticated animals and to ensure a reasonable quality of life to all residents and visitors of Lake County.

<u>Funding Types</u>	<u>Amount</u>
Legislative Funding Request	\$ 39,148
Local funding	\$820,000
Total	\$859,148

Appropriation Amount

The Lake County Board of County Commissioners is requesting **\$39,148** for the continued funding assistance of the Mosquito Control Program.

Fiscal Impact

The total project cost estimate is **\$859,148**.

LEGISLATIVE POSITION
REQUEST CREATION OF A STUDY COMMISSION ON AGENDA 21

POSITION

The Lake County Board of County Commissioners (LCBCC) requests the Lake County Delegation request and/or support creation of a study commission to review and evaluate the relevance and impact of Agenda 21 – The United Nations Programme of Action from Rio upon the State of Florida.

BACKGROUND/JUSTIFICATION

The United Nations convened the Conference on Environment and Development (UNCED) which was held in Rio de Janeiro, Brazil, 3 to 14 June 1992 commonly referred to as the Rio Conference. At the conference 178 world governments, including the United States adopted Agenda 21 as a comprehensive plan of action to be taken globally, nationally and locally by organizations of the United Nations System, Governments, and Major Groups in every area in which human impacts on the environment. The Conference also resulted in the United Nations approval of the RIO DECLARATION ON ENVIRONMENT AND DEVELOPMENT in August of that year.

It has been suggested that these two documents may impact the State of Florida and its future development and economy in a detrimental manner. In order to determine what those impacts might be and how to prevent them, Lake County requests the Legislature create a Commission to evaluate Agenda 21 and identify and define such policies, and formulate recommendations to minimize or eliminate those impacts.

Funding for the Transportation Disadvantaged Program

Position: Continuous support of the Transportation Disadvantaged Program administered through the Florida Commission for the Transportation Disadvantaged (FCTD)

Background/Justification:

The Transportation Disadvantaged Program was established by the Legislature in 1979 and enhanced in 1989 with the creation of the independent Commission for the Transportation Disadvantaged and the establishment of the Transportation Disadvantaged Trust Fund. The purpose of this program is to ensure statewide the availability of efficient, cost-effective, and quality transportation services for our transportation disadvantaged citizens. Through coordination of multiple funding sources at the local level, the funds are maximized to provide transportation disadvantaged individuals with the vital transportation services they need.

Florida's seniors, the disabled, low income, and children at risk who have no other form of transportation depend on the Transportation Disadvantaged Trust Fund to assist them with daily transportation needs. Transportation is provided for such purposes as doctors and medical appointments, grocery shopping and other nutritional activities, employment, job training, educational purposes or to obtain other essential services of daily living that are not sponsored by any other funding source.

The Transportation Disadvantaged Trust Fund is funded at approximately \$44,182,179 this year to provide trips to Florida's most vulnerable populations when no other funding sources are available.

With more and more of Florida's population becoming eligible for the transportation disadvantaged program, ongoing as well as additional funding, is needed to continue to provide this service throughout the State and in Lake County.

According to statistics from the CTD Annual Performance Report for fiscal year 2010-2011 the coordinated system provided over 700,000 Floridians with 51,000,000 trips statewide. In Lake County a total of 213,015 trips were provided system wide to 14,698 different clients. In FY 2010/11 trips in Lake County were prioritized for medical, nutritional, employment, and training/educational. There were 6 unmet trips reported during that time period. In FY 2011-12 the County had to discontinue providing employment and educational trips. LakeXpress (the County's fixed route transportation system) plays a vital role in meeting many of the transportation needs for the transportation disadvantaged population.

Appropriation Amount

The Commission for Transportation Disadvantaged budget for FY 2011-12 is \$44,182,179. The funding is dispersed among the 67 counties based upon the formula contained in the

statute. Of the total funds, 97% are used to fund the grant program and the Commission uses 3% for their operational costs.

The current statewide fiscal impact is \$44,182,179. Lake County's expected share from the CTD is \$565,679. The local match is \$62,853, for a total amount of \$628,532. Lake County is respectfully requesting that the Legislature please keep the funding for this program intact for the 2012-13 fiscal year.

LEGISLATIVE POSITION

REQUEST FUNDING FOR: SOUTH LAKE TRAIL PHASE IIIB FROM SILVER EAGLE DR. TO CRITTENDEN DR. in the City of Groveland, Florida

POSITION

The Lake County Board of County Commissioners (LCBCC) requests the Lake County Delegation request/ support funding for the South Lake Trail Phase IIIB Project: (Silver Eagle Drive to Crittenden Dr. Groveland, FL).

BACKGROUND/JUSTIFICATION

The South Lake Trail will be a functional component of the overall transportation system in Lake County by providing several non-motorized modes of transportation (bicyclists, pedestrians, skaters and equestrians) on a safe off-road facility for schools, parks, municipal governments and retail shopping.

The trail is also a part of the Central Florida Trail Loop. The proposed trail will establish an important connection in an extended network of trails and greenways throughout Central Florida, linking Orange County's West Orange Trail to the State of Florida's General Van Fleet (Green Swamp) Trail. The proposed trail would link the municipalities of Minneola, Clermont, Groveland and Mascotte. This would provide the citizens of these cities a safe, alternative transportation route. The trail also would connect four schools and three parks. The design phase is complete. We are requesting for Right of Way acquisition and construction phase in the amount of \$5 million for the phase IIIB segment which is from Silver Eagle Drive (near South Lake High School in Groveland) to Crittenden Drive in the center of Groveland.

APPROPRIATION

The Lake County Board of County Commissioners is requesting \$ 5,000,000.00 for the right of way and construction of the South Lake Trail Phase IIIB: From Silver Eagle Drive to Crittenden Dr. in the City of Groveland, FL. Requests for other funding sources will be based on feedback from the Florida Legislature.

FISCAL IMPACT

\$ 5,000,000.

**LEGISLATIVE POSITION
REQUEST CHANGES TO FLORIDA STATUTE 790.33 –
Field of Regulation of Firearms and Ammunition Preempted**

POSITION

The Lake County Board of County Commissioners (LCBCC) requests that the Lake County Delegation request/support statutory changes related to the discharge of firearms where there is a clear and present danger to public safety.

BACKGROUND/JUSTIFICATION

F.S. § 790.33(1) states “. . . Except as expressly provided by the State Constitution or general law, the Legislature hereby declares that it is occupying the whole field of regulation of firearms and ammunition, including the purchase, sale, transfer, taxation, manufacture, ownership, possession, storage, and transportation thereof, to the exclusion of all existing and future county, city, town, or municipal ordinances or any administrative regulations or rules adopted by local or state government relating thereto. Any such existing ordinances, rules, or regulations are hereby declared null and void.”

Since implementation of HB 45 (2011) and its effective date October 1, 2011, multiple incidents have occurred where citizens of Lake County reported gunfire from nearby properties resulting in bullets landing near them while located on their own property.
