

PLANT LIST FOR LAKE COUNTY

Helping you make the right choice for your landscape.

Issued December 2009

INTRODUCTION

This list has been prepared to accompany the landscaping regulations in the Lake County Land Development Regulations. This resource provides lists of suitable and unsuitable landscaping materials. The lists of suitable trees and shrubs should be used to select the vegetation required to meet minimum landscaping standards.

RESOURCES

The Plant List for Lake County has been developed from the following resources:

- 1. Plants** - Florida Yards and Neighborhoods, Florida-Friendly Plant List 2006, as amended. The Florida Yards and Neighborhoods plant list may also be located at the website: <http://fyn.ifas.ufl.edu/materials/list.pdf>

Additionally, an interactive website for plant selection is located at: <http://floridayards.org/fyplants/index.php>

- A. The required approved plants shall be selected from the Hardiness Zones 9A and/or 9B listings, or as appropriate for Lake County, FL.
 - B. Trees that have a mature height listed as thirty-one (31) feet or greater shall be considered Canopy Trees and those trees that have a mature height of less than thirty-one (31) feet shall be considered Ornamental Trees. Trees listed with a "varies" height shall be evaluated on a case-by-case basis.
 - C. Plants listed as "Vines", "Grasses" and "Perennials" are generally considered groundcovers; however those plants that meet the required dimensional sizes (height, spread and container size) may be credited as shrubs or groundcover. Plants listed as "Annuals" may only be credited towards required groundcovers when utilized.
 - D. Plants listed as "Palms and Palm-Like Plants" in the Florida Yards and Neighborhoods listing may be credited as palm trees when the mature listed height is greater than sixteen (16) feet.
- 2. Turf** – New and Not So New Lawn Grasses for Florida, (Publication ENH 1033) as amended by IFAS (Institute of Food and Agricultural Sciences) at the University of Florida Extension Service. <http://edis.ifas.ufl.edu/EP288>
