

**Orange County Comments on the Wellness Way Sector Plan (Draft 8/23/13)**

Section	Page/Exhibit	Comments
II	Various locations	Water Conserv II is incorrectly referred to as “Conserve II”.
II	47	The text states that reclaimed water generated by Water Conserv II is “generally available for use by low consumption commercial or residential consumers”. Depending how the reader interprets “generally”, this could leave a misleading impression that there is an unrestricted supply available from WCII.
II	Map 11: FLUCFCS Land Cover	The map Indicates more citrus on WCII Sites 1 and 10 than actually exists, and shows predominant land use as “Field Crops” when it should more accurately be “Pasture”.
II	Map 12: Known Species on Site	The map does not reflect the large population of gopher tortoises on Water Conserv II Sites 1 and 10, although text on page 31 (page 34 of pdf) does accurately qualify the public database information this map was based on by saying “it is quite likely that gopher tortoises occur throughout the area”.
II	Map 18: Aquifer Recharge Areas	Appears to under-indicate recharge rates at RIB Site 2.
II	Map 25: Future Improvements & Roadway Network	The main east-west route crosses the proposed footprint of the Water Conserv II reclaimed water reservoir. This would constrain development of adequate reservoir – especially if the road is not sufficiently elevated to allow for intended reservoir water levels.
III	Framework Map	<p>The map appears to:</p> <ul style="list-style-type: none"> <li>• Eliminate a number of the proposed RIB locations on the east end of Water Conserv II Site 1.</li> <li>• Truncate the south end of the Water Conserv II reclaimed water reservoir footprint.</li> </ul> <p>If the reservoir operating volume is reduced, the ability of the Water Conserv II system to provide future reliable reclaimed water supplies to customers covered by the Wellness Way Sector Plan will also be reduced.</p>
IV	Proposed Land Use Plan	Please confirm that none of the proposed future land zoning requirements will restrict the operations of the Water Conserv II RIBs or reservoir.
IV	13	Orange County and the City of Orlando should be included in the list of “Intergovernmental Coordination” entities.
